Hawaii Chemigation Guide

March 2007

A study guide for persons seeking certification by the State of Hawaii Department of Agriculture to buy, use, or supervise the use of restricted use pesticides applied through irrigation systems

Prepared by the staff of the Pesticide Risk Reduction Education Program, Cooperative Extension Service, College of Tropical Agriculture and Human Resources, University of Hawaii at Manoa
Acknowledgments

This study guide is mainly a reproduction of Virginia Tech’s study guide, *Guide for Pesticide Chemigators in Virginia* (2003). Virginia Tech’s study guide was adapted for Hawaii by changing the title and table of contents, deleting illustrations and two appendices, adding one illustration, and editing text about laws and regulations and other topics.

We gratefully acknowledge effort of several of the staff at Hawaii Department of Health’s Safe Drinking Water Branch. They reviewed and provided comments about Virginia Tech’s study guide.
